

## EINLADUNG ZUM VORTRAG

# LATEST DISCOVERIES OF THE SPANISH MISSION IN DRA ABU EL-NAGA

**JOSÉ MANUEL GALÁN***Centro de Ciencias Humanas y Sociales, Madrid*

The Spanish mission working at Dra Abu el-Naga (Luxor) discovered in February 2017 a small ritual garden/orchard at the entrance of a 12<sup>th</sup> Dynasty rock-cut tomb (ca. 2000 BC). Only a few similar gardens were known (Mirgissa, Amarna), but none of them had been found in a funerary context. The presentation will focus on its significance and the archaeological context in which it was discovered, including material culture from the 11<sup>th</sup> to the early 18<sup>th</sup> Dynasty.

Im Anschluss an den Vortrag bitten wir zu einem Glas Wein.

Prof. Dr. Barbara Horejs  
(Direktorin)
