Programme of the International Symposium

The role of elites of the 1st millennium BC between Central Europe and the Southern Balkans with the case study of the "Horse and Rider of Babunja"

May 13 – 15, 2025

Venue of the conference: Natural History Museum Vienna, Room 19, Burgring 7, A-1010 Vienna

Hosts of the conference

Natural History Museum Vienna

Albanian Academy of Sciences

in cooperation with the Ambassador of the Republic of Albania in Austria

Approach and content of the conference

The diverse aspects of the role of members of the elite will be presented and discussed at the conference. The academic discourse on the accompanying material culture, the prestige goods, the corresponding trade routes and communication networks between Central Europe and the Balkans in the 1st millennium BC will be the focus of the conference. In order to embed this in a larger framework, theoretical concepts on social structure and identities in the 1st millennium BC will also be the subject of discussion. Grave finds in particular are able to demonstrate an impressive picture of the differentiated role of elites and their multi-layered social, political and ritual-religious functions, but also the specific roles of female and male elite members on the basis of their specific grave inventories.

The occasion for the conference is the outstanding bronze statuette of the so-called "Horse and Rider of Babunja", a settlement near Apollonia of Illyria, located in present day Albania. Discovered during the Albanian-German research excavations in 2018, the artwork is now to be presented to the public at the Natural History Museum Vienna in 2025 following its subsequent restoration at the Getty Museum in the USA and its return to Europe. The statuette, which was made in a Greek workshop in the Late Archaic period around 510–490 BC, is a unique artistic masterpiece of Greek bronze sculpturing. Although the person on horseback is carrying weapons, the stylistic (iconographic) peculiarities of archaism make it unclear whether it is a horseman or perhaps even a horsewoman. The outstanding statuette also offers a good opportunity to discuss the interaction of Greek Poleis and settlements with the local inhabitants and especially their elites.
