**Is Attic Greek μέν (*mén*)
a Wackernagel's Law particle?**

In this talk the seemingly simple question will be asked whether the syntax of Attic Greek μέν (*mén*) is relevant to the empirical assessment of the validity of Wackernagel's Law. It turns out that attempting to answer this question opens up a wealth of unpleasant complications, consideration of which allows for a richer understanding of clitic syntax in Attic Greek, and in Archaic IE languages (and other human languages) more generally.

Zeit: Dienstag, 26. April 2016, 18 Uhr 30

Ort: Sensengasse 3a, Hörsaal 1 (1. Obergeschoß)
