

## The Vienna Conference on Word Order, Headedness and Linearization (WOHL2026)

Conference venue: Hörsaal 1, 1st floor, Sensengasse 3a, 1090, Vienna

### Day 1 (July 1): Main session

|               |                                                                                                                                                                                                                                             |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 - 9:00   | Registration                                                                                                                                                                                                                                |
| 9:00 - 9:10   | Introductory remarks                                                                                                                                                                                                                        |
| 9:10 - 10:25  | Caterina Donati (LLF - CNRS/Université Paris Cité):<br>One linearisation, two linearisations, no linearisation: what happens with word order when two languages are produced simultaneously (invited talk)                                  |
| 10:25 - 11:00 | Carlo Cecchetto (University of Milan Bicocca & SFL - CNRS/Paris 8) & Adrien Dadone (University of Leiden):<br><a href="#">When you do not linearize: Simultaneous production in sign languages challenges the theories of linearization</a> |
| 11:00 - 11:30 | Coffee break                                                                                                                                                                                                                                |
| 11:35 - 12:10 | Marcel den Dikken (ELTE Research Centre for Linguistics & Centre of Linguistics, University of Lisbon):<br><a href="#">VP- and vP-fronting inside the Germanic Mittelfeld: Word order and information structure</a>                         |
| 12:10 - 12:45 | János Egressy (UCLA):<br><a href="#">Williams Cycle effects and successive cyclicity unified</a>                                                                                                                                            |
| 12:45 - 14:30 | Lunch break                                                                                                                                                                                                                                 |
| 14:30 - 15:05 | Svitlana Antonyuk (University of Graz), Yanis da Cunha (University of Graz) & Daniel Shevchenko (University of Southern California):<br><a href="#">Hiding in plain sight: when two syntactic constructions share a linearization</a>       |
| 15:05 - 15:40 | Lada Pasko (Lomonosov Moscow State University & Institute of Linguistics RAS):<br><a href="#">OSV and OVS in Russian: Experimental evidence from Weak Crossover</a>                                                                         |
| 15:40 - 16:15 | Mitya Privoznov (Göttingen University) & Hedde Zeijlstra (Göttingen University):<br><a href="#">*A B and</a>                                                                                                                                |
| 16:15 - 16:45 | Coffee break                                                                                                                                                                                                                                |
| 16:45 - 18:00 | Ad Neeleman (University College London):<br>Word order as a function of grammar and parsing (invited talk)                                                                                                                                  |

### Day 2 (July 2): Main session

|               |                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 - 9:10   | Registration                                                                                                                                                                                                                                                                                                                                                                                                      |
| 9:10 - 10:25  | Theresa Biberauer (University of Cambridge):<br>FOFC and FOFC-type effects: Implications for linearization, variation and change (invited talk)                                                                                                                                                                                                                                                                   |
| 10:25 - 11:00 | Dimitris Michelioudakis (Aristotle University of Thessaloniki), Natalia Chousou-Polydouri (Institute for Mediterranean Studies - FORTH), Nikos Angelopoulos (CNRS/University of Patras), Christos Zioutis (University of Crete) & Elena Anagnostopoulou (University of Crete/Institute for Mediterranean Studies - FORTH):<br><a href="#">Word order in IE: an evolutionary approach to parameter hierarchies</a> |
| 11:00 - 11:30 | Coffee break                                                                                                                                                                                                                                                                                                                                                                                                      |
| 11:35 - 12:10 | Robert Truswell (University of Edinburgh):<br><a href="#">Wh-movement and wh in situ: Theory, typology, and diachrony</a>                                                                                                                                                                                                                                                                                         |

|               |                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12:10 - 12:45 | Erika Asztalos (ELTE Research Centre for Linguistics), Corinna Langer (Goethe University Frankfurt) & Balázs Surányi (ELTE Research Centre for Linguistics & Pázmány Péter Catholic University):<br><a href="#">Does prosody compensate for lack of word order marking? Disambiguating negated narrow focus sentences in Udmurt</a>                                                                                                             |
| 12:45 - 14:30 | Lunch break                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 14:30 - 15:05 | Nikos Angelopoulos (CNRS/University of Patras), Christos Zioutis (University of Crete), Elena Anagnostopoulou (University of Crete/Institute for Mediterranean Studies - FORTH), Dimitris Michelioudakis (Aristotle University), Natalia Chousou-Polydouri (Institute for Mediterranean Studies - FORTH) & Pavlos Pavlidis (University of Crete):<br><a href="#">Greenberg's U20: turning Cinque's approach into a model of language change</a> |
| 15:05 - 15:40 | Poster session                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 15:40 - 16:10 | Coffee break                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 16:10 - 17:25 | Guglielmo Cinque (Ca' Foscari University Venice):<br>LF feeds linearization (or the locus of linearization in UG) (invited talk)                                                                                                                                                                                                                                                                                                                |
| 19:00 -       | Conference Dinner                                                                                                                                                                                                                                                                                                                                                                                                                               |

### Day 3 (July 3): Workshop

|               |                                                                                                                                                                                                                                            |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 - 9:10   | Registration                                                                                                                                                                                                                               |
| 9:10 - 9:45   | Rajesh Bhatt (Umass Amherst), Carlo Cecchetto (University of Milan Bicocca & SFL - CNRS/Paris 8), Caterina Donati (LLF - CNRS/Université Paris Cité) & Léa Nash (SFL - CNRS/Paris 8):<br><a href="#">Reduced structures and ergativity</a> |
| 9:45 - 10:20  | Aleksandra Belkind (ELTE Research Centre for Linguistics):<br><a href="#">The size of non-inflectional constructions in German</a>                                                                                                         |
| 10:20 - 10:50 | Coffee break                                                                                                                                                                                                                               |
| 10:50 - 11:25 | Jong-Bok Kim (Kyung Hee University, Seoul): Ample Negatives as Truncated Clause Constructions:<br><a href="#">A Corpus-Based Investigation and Construction Grammar Approach</a>                                                           |
| 11:25 - 12:00 | Thomas Schökler (Aoyama Gakuin University) & Shoichi Takahashi (Aoyama Gakuin University):<br><a href="#">Was für-Split in sluicing: Yet Another 'Merchant's Wrinkle' Ironed Out</a>                                                       |
| 12:00 - 12:35 | Peter Ackema (University of Edinburgh) & Ad Neeleman (University College London):<br><a href="#">Patterns of partial ellipsis in Dutch right dislocation</a>                                                                               |
| 12:35 - 14:10 | Lunch break                                                                                                                                                                                                                                |
| 14:10 - 14:45 | Josep Quer (ICREA/Universitat Pompeu Fabra) & Maria Lekakou (University of Ioannina):<br><a href="#">Truncated or not, these are alternative concessive conditionals</a>                                                                   |
| 14:45 - 15:20 | Marcel den Dikken (ELTE Research Centre for Linguistics & Centre of Linguistics, University of Lisbon):<br><a href="#">Root past participles in Dutch: The role of truncation</a>                                                          |
| 15:20 - 15:50 | Coffee break                                                                                                                                                                                                                               |
| 15:50 - 17:20 | Reduced structures and grammatical theory - Roundtable discussion (Introductory presentation: Tamás Halm - University of Vienna & ELTE Research Centre for Linguistics)                                                                    |
