

## Vortrag

**Mittwoch, 25. September 2013 bis Freitag, 27. September 2013, von 10:00 Uhr bis 12:00 Uhr, Seminarraum 15, 3. Stock, OMP1, 1090 Wien**

### **Minicourse**

**Wilhelm Schlag (University of Chicago): „Analytical methods in the theory of Schrödinger operators with quasiperiodic potentials “**

*Abstract: We will present some of the tools developed by Bourgain, Goldstein, and the speaker to study a class of Schrödinger operators on both the line  $\mathbb{Z}$  as well as higher-dimensional lattices. These methods rely on properties of subharmonic functions, but also involve ideas from semi-algebraic sets.*

**(Details siehe Attachment)**

**Organized by A. Kostenko, G. Teschl**
