"Random cracks in space"

"Random cracks in space"

Abstract:

We will describe in non-technical terms some old and new ideas about what basic natural random objects and fields one can define in a given space with some geometric structure, and what one can do with them. This will probably include various joint recent and ongoing work with Jason Miller, Scott Sheffield, Qian Wei and Titus Lupu.

**Zeit: Dienstag, 24. Jänner 2017
10:30-11:30 Uhr Vortrag,**

**Ort: Fakultät für Mathematik,
Oskar-Morgenstern-Platz 1,
Sky Lounge**
