HABILITATIONSVORTRAG

Ass.-Prof. Dr. Anton Mellit
(Fakultät für Mathematik, Universität Wien)

"On q, t-symmetric functions."

"On q, t-symmetric functions."

Abstract: Since the discovery of Macdonald polynomials by Macdonald in the eighties, these polynomials and related functions keep showing up as generating functions of certain refined invariants of interesting algebraic spaces. I will talk about examples of these situations, some of which remain conjectural, recent progress and partial results.

Freitag, 11. Oktober 2019,
10:30 Uhr – 11:15 Uhr,

Fakultät für Mathematik,
Ort HS 15, 2 OG.
