Vienna PDE Afternoon

12.01.2022 from 14:00 to 16:00

From 14:00 to 14:45:

[Jan-Frederik Mennemann](#) (University of Vienna)

Simulations of Bose-Einstein condensates at finite temperature including time-of-flight expansion in three spatial dimensions

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=625>

From 15:00 to 15:30:

[Daniel Toneian](#) (University of Vienna)

Measurable selection and (bicausal) optimal transport

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=626>

From 15:30 to 16:00:

[Andrea Chiesa](#) (University of Vienna)

Variational methods in material sciences: the data-driven approach

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=627>

The seminars take place on Zoom. The Zoom link is sent per email through the DK/SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://www.univie.ac.at/sfb65/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
