Vienna PDE Afternoon

01.06.2022 from 14:15 to 15:00

University of Vienna, Faculty of Mathematics
Oskar-Morgenstern-Platz 1, Vienna
HS 02, ground floor

and online on Zoom

Luca Scarpa (Politecnico di Milano, Italy)

Variational methods for doubly nonlinear stochastic evolution equations

Abstract: https://sfb65.univie.ac.at/#!/public/events/details/?type=1&id=669

The seminar takes place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the DK/SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/

Alternatively, if you are interested only in this seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
