Taming Complexity in
Partial Differential Systems

Austrian
Science Fund

Vienna PDE Afternoon

Wednesday, 24.04.2024 from 14:00 to 15:45

University of Vienna, Faculty of Mathematics

Oskar-Morgenstern-Platz 1, Vienna

HS 2 (ground floor) and Zoom

From 14:00 to 14:45:

Matthias Röger (TU Dortmund, Germany)

Phase separation on varying surfaces and convergence of diffuse interface approximations

Abstract: <https://sfb65.univie.ac.at/s/oa/>

From 15:00 to 15:45:

Ani Miraçi (TU Wien)

Parameter-robust convergence and optimal complexity of AFEM

Abstract: <https://sfb65.univie.ac.at/s/ob/>

The seminars take place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
