

INVITATION

as part of the Gravitational Physics Literature Seminar

to the talk by

Marios CHRISTODOULOU
(IQOQI Vienna)

on

“Frontiers in Table Top Quantum Gravity”

Abstract:

Table Top Quantum Gravity nowadays colloquially refers to a forming interdisciplinary field that includes diverse contributions from theorists, experimentalists and philosophers alike across a range of disciplines from spacetime physics to quantum technologies.

I discuss some of my contributions to the debate surrounding this nascent research field, while giving an overview of recent ideas and foundational issues that have arisen.

Time: Wednesday, 27 November 2024, 2:15 p.m.

Location: Seminar Room A, Währinger Straße 17, 1090 Vienna, 2nd floor
