## Vienna PDE Afternoon

29.01.2025 from 14:00 to 15:30

University of Vienna, Faculty of Mathematics, Oskar-Morgenstern-Platz 1

HS 2, ground floor and online on Zoom

From 14:00 to 14:45:

**Gianluca Favre** (University of Vienna)

*Social Networks: How to Model Them (and Us Within Them)*

Abstract: <https://sfb65.univie.ac.at/s/pk/>

---

From 15:00 to 15:30:

**Filippo Quattrocchi** (IST Austria)

*Discrete-to-continuum limits of optimal transport with linear growth on periodic graphs*

Abstract: <https://sfb65.univie.ac.at/s/pl/>

---

The seminars take place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to [matteo.tommasini@univie.ac.at](mailto:matteo.tommasini@univie.ac.at) (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
